

Climate adaptation: Updates from the EEA and Work from our Councils

Six months after the FRDO-CFDD's and Minaraad's [conference on Adaptation](#), we invite you to join a follow-up webinar to explore the latest insights and strategies on this critical topic.

This session will dive deeper into adaptation policies, case studies, and financing mechanisms. We have three speakers with three different types of new insights into the topic.

2 October 2024

14:00-15:30 CEST

secretariat@eeac.eu

The Rli recently published an advice on Adaptation for the Dutch Government. Linde Jehee will present the [Spatial Planning in a Changing Climate](#) report. After the EEA already presented its Risk Assessment Report in Brussels this April, we will now hear from Kati Mattern on [lessons and inspiration from Climate-ADAPT case studies](#).

Lastly, the FRDO-CFDD has been working on the topic of financing adaptation and Nathalie Boucquey sketch out the various elements of the EU regulatory framework that will facilitate the financing of corporate adaptation to climate change. We look forward to a lively open debate after the presentations.

14:00 - 14:20

Presentation of the report: Spatial Planning in a Changing Climate

Linde Jehee, Council for the Environment and Infrastructure (Rli)

14:25 - 14:45

EU support for adaptation practice through the European Climate Adaptation Platform (Climate-ADAPT)

Kati Mattern, European Environment Agency (EEA)

14:45 - 14:50

Coffee Break

14:50 - 15:05

Open Q&A Session with Speakers

15:05 - 15:15

Financing Adaptation: Updates on EU legislation from the Belgian Council

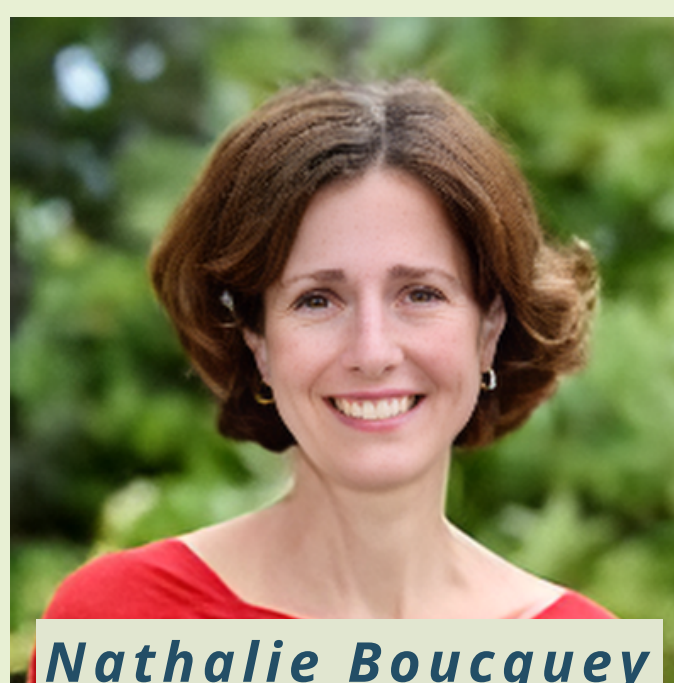

Nathalie Boucquey, Federal Council for Sustainable Development (FRDO-CFDD)

15:15 - 15:30

Open Discussion

Kati Mattern

Nathalie Boucquey

Linde Jehee

Organized by the EEAC Network
